Leroy

Not complaining about your actions. I am complaining again about the CBI process which is expensive and slow.

I want the carbon unit out today. It should be a 4k lb unit. What are the specs?

Gary

I will provide details on delivery as soon as I know. My knowledge of the definite need for the Carbon Vapor Unit of the size required to handle the 4,300 cfm of the vacuum truck air mover, was Thursday last week. I quickly wrote a Statement of Work and started the procurement process.

> The RFB for the carbon adsorption unit was a very quick turnaround for the vendors. I submitted the SOW and Zero requisition to the Subcontracting Manager on Thursday after our discussion. We submit the RFB the same day on Thursday and asked for the bids COB today. We have received several bids. We are currently evaluating the bids, so we can make an award.
